

Position:	Intermediate Structural Engineer (Bridge or Marine)
Status:	Permanent, Full Time
Location:	Nanaimo, BC or Victoria, BC
Salary Range:	\$90,000 - \$115,000 (based on 37.5 hrs. / week)

Our Company:

Herold Engineering Limited is a Vancouver Island based consulting civil, structural building envelope, marine and bridge engineering firm with offices in Nanaimo, Ucluelet, and Victoria, BC. We are a dynamic and diverse company with over 70 employees involved in a wide variety of public and private sector building, transportation, marine and civil/municipal infrastructure projects in British Columbia. We are a community-based company making a difference by supporting local businesses, charities and organizations.

At Herold Engineering we believe in a healthy work life balance and we promote growth from within our organization. We are dedicated to our staff and the continuing of professional development.

Employment Opportunity:

We are actively involved in a wide range of public and private sector projects throughout British Columbia with the majority of our work on Vancouver Island. Herold Engineering (Industrial, Marine and Bridge Group) is looking for an Intermediate Structural Engineer with 5 to 10 years of P.Eng. experience in the bridge or marine structural engineering industry, preferably with design and construction site experience and proficiency in a project engineering role.

A competitive salary, extended health benefits and an excellent work environment in a well-respected, growing consulting firm await the successful candidate. For the right candidate, there will be leadership and ownership opportunities as the group grows to service our diverse client base.

Roles and Responsibilities

The position would be working closely with experienced Structural Bridge Engineers who will provide mentorship and collaboration.

Our project sizes are well diversified and range from small to large projects generally including the following:

- Assessment and reporting for existing structures
- Greenfield and brownfield structural design
- Structural Design in steel, concrete and timber
- Construction related field work
- Design team mentoring
- Project Engineering and design team management

Requirements:

Eligible candidates:

- should be registered or eligible for registration as a Professional Engineer with EGBC
- should have experience in steel, concrete and timber design
- will be keen to learn in a fast-paced, demanding environment
- will be willing to develop new skills
- can adapt to Herold Engineering's philosophy of diversification and should be comfortable dealing directly with a wide range of government and private sector clients.
- have a valid Class 5 British Columbia driver's license and willing and able to travel as needed in order to service our numerous projects located throughout British Columbia.
- can attend active construction sites as part of the job
- should be familiar with the process of periodic engineering review of works-in-progress, to determine general conformity with design documents.
- should be familiar with current local code requirements
- with past experience working on a broad range of marine and bridge projects are preferred.

Living on Vancouver Island:

An added benefit to this opportunity is living and working in Victoria or Nanaimo which are located on coastal Vancouver Island. Central location, mild climate and easy access to many outdoor recreational opportunities make Vancouver Island an attractive place to live. Herold Engineering aims to create a work environment where balance between personal life and work life is valued, so that our employees can enjoy the fantastic natural environment that Vancouver Island life has to offer. We work closely with clients from metro Vancouver and from the BC mainland which is less than a 2-hour ferry ride or a 30-minute flight away from harbour to harbour.

A Future with Herold Engineering:

Herold Engineering is a diverse and growing company with opportunities for each team member to grow their career. This is achieved through our diversity of clients and opportunities and intentional career development.

We believe in work life balance and flexibility for our team. Our experience is that this provides our team members an opportunity to thrive with their goals both personally and professionally.

Our market includes a range of clients with operations locally and in remote locations along the BC Coast and Interior which provides opportunities for our team to visit these unique locations and experience some exciting adventures while working on interesting projects.

At Herold Engineering we value our team and structure our business to ensure sustainability and success of each group. In line with this approach, we have developed an Associates program for key team members to participate in ownership of the firm and receive the benefits that accompany ownership.
